## SUPPORT DATA SHEET

## AN 3

Supply and installation of supports for raised floors, adjustable in height, equipped with be-material head, with anti-noise and anti-slip rubber finish. The supports consist of polypropylene elements consisting of a support base with a minimum diameter of mm. 205, a screw with variable height from mm .60 to mm . 100, equipped with an anti-unscrewing safety block and a head equipped with n .4 spacers, $\mathrm{h} . \mathrm{mm} .12$ with a thickness of mm . 2-3-4, easily removable in case of need. In the base there are holes for the outflow of water and n. 4 "guidelines" to facilitate cutting in case of need. Height adjustment is carried out using a special standard adjustament key, which acts on the screw independently of both the
 head and the base.

Technical characteristic
Central compression limit resistance Limit resistance to eccentric compression Slope compensation Hardness

Physico-chemical characteristics Reaction to fire
Resistance to low temperatures

## PRODUCT LINE

## (1) PRODUCTCODE

 AN 3
## (2) Characteristics

Height adjustment. Bi-material head (PP + Rubber). Height adjustment key. Easily removable spacer flaps. Anti-unscrewing safety lock.

RAW MATERIAL
Polypropylene and rubber (head finish).

## (4) ENVIROMENTAL IMPACT

Recyclable - not dangerous waste

## (5) APPLICATION AREA (SUPPORTING PLAN)

On any waterproof membrane. On any rigid insulation panel. On any solid and compact laying surface.

## (6) APPLICATION AREA (FLOORING)

With any self-supporting prefabricated element for outdoor flooring, with a minimum thicknees of mm. 15. $46,53 \mathrm{kN}$
$70( \pm 3)$ Shore d
class E (UNI EN 13501-1:2009)
